

Product Roadmap - AI File Assistant

Phase 1 (Complete): Core file readers for PDF, DOCX, XLSX, and TXT.

Phase 2 (Complete): Keyword search across folders with ranked results.

Phase 3 (Complete): LLM-powered summarization with map-reduce for long documents.

Phase 4 (Complete): Retrieval-augmented question answering over documents.

Next steps under consideration: vector-based semantic search, multi-document question answering, and a lightweight web UI for non-technical users.

Estimated engineering effort remaining: 2 weeks for a solo developer.
